### **DETAILED ACTION**

(1). The applicant's Remarks filed on September 19, 2005 has been received and fully considered. The references of IDS are considered and attached with this Office Action.

As the results, the rejections for claims 1-8 in the prior Office Action dated on July 18, 2005 are withdrawn.

Claims 1-8 are allowable currently.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: After further consideration, coupled with counsel's opinions, the instantly claimed invention is allowable over the prior art of the record as per said art neither anticipating nor rendering obvious to fulfill the meticulously defined math model representing the desirable content of sulfide bond ionic groups in relationship with degree of polymerization, which characterizes the polyvinyl acetal composition of applicant's invention. Although the prior art of records - Yoshida (US20040157078A1) discloses a polyvinyl acetal composition with degree of acetalization such as > 60 mol%, degree of polymerization between 50 – 3500 and degree of hydrolysis of from 80.0 to 99.99 mol%, all overlaps with the applicant's claimed ranges, however, the sulfido bonded ionic terminating group which is disclosed by Yoshida does not discover this relationship characterizing the polyvinyl acetal composition of applicant, nor illustrate any criticality of content of sulfido bonded ionic terminating groups in the properties of final products. This specific relationship as claimed, one having ordinary skill in the art would not have been

endowed with any motivation to find or to conclude with this empirical math model from any of the prior art of record with any reasonable expectation of success.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
